SUMMARY

Full-stack engineer with hands-on experience optimizing more than 25 Spring Boot APIs, achieving a 50% reduction in latency. Implemented CI/CD pipelines that decreased rollbacks by 70%. Focused on writing maintainable Java and TypeScript code, deploying features reliably, and resolving production issues to ensure system stability.

EDUCATION

- Lovely Professional University** Jalandhar, India
Bachelor of Technology in Computer Science; CGPA: 8.9 Jul 2020 – Jun 2024
 - Relevant Coursework:** Data Structures & Algorithms, Operating Systems, Cloud Computing, Database Management Systems, Object Oriented Programming

TECHNICAL SKILLS

Programming & Frameworks: Java, Spring Boot, Spring Security, TypeScript, Angular.js
Databases: MySQL, NoSQL
Cloud & DevOps: Azure, Docker, Kubernetes, Rancher, Helm
Integration & Messaging: REST, Kafka, Temporal
Version Control & OS: Git, Linux
Monitoring & Observability: Grafana, Prometheus, Datadog
SDLC Tools: JIRA, Confluence, SonarQube, Artifactory, Snyk

PROFESSIONAL EXPERIENCE

ZopSmart (~2 years) Bangalore, India
Software Development Engineer I Jul 2024 – Present

- Designed and scaled 20+ Spring Boot microservices using **Kafka** and Spring Security for secure, event-driven workflows; migrated legacy monolithic components to microservices architecture, reducing response latency by 50%.
- Deployed containerized services via **Kubernetes** and Helm across environments, ensuring consistent configurations and zero-downtime deployments.
- Developed automated **GitHub Actions** CI/CD pipelines with validation gates, reducing rollback incidents by 70%; implemented observability using **Grafana**, **Prometheus**, and Datadog, achieving 99.9% uptime and reducing MTTR by 40%.
- Orchestrated complex workflows using **Temporal** for product data processing, handling schema validation, business derivations, and domain updates across 7+ workflow types; collaborated with cross-functional teams to improve feature delivery speed by 30%.

Software Development Engineer Intern Jan 2024 – Jun 2024

- Built and deployed Java Spring Boot microservices with RESTful APIs; led adoption of test-driven development using **JUnit** and **Mockito**, increasing code coverage by 45%.

PROJECTS

Training and Upskilling v2 (GitHub) TypeScript, Angular.js, MySQL

- Developed full-stack e-learning platform for 500+ users with structured course publishing, real-time progress tracking, and interactive dashboards, increasing learner retention by **40%** and course completion rates by **35%**.
- Orchestrated course scheduling, certificate automation, and invite-based enrollment, reducing manual admin efforts by **6+ hours/week**.

Automated Deployment Pipeline (GitHub) Jenkins, AWS EC2, Ansible, Docker, Kubernetes

- Automated CI/CD using Jenkins and GitHub on AWS EC2, provisioned infra with Ansible, containerized apps with Docker, and deployed via Kubernetes using YAML—cut deployment effort by **80%** and improved deployment frequency by **3x**.

CERTIFICATIONS

- Data Structures and Algorithms – GeeksForGeeks
- Web Development Bootcamp – Udemy
- Database Management Systems – Infosys Springboard
- ML,Deep Learning,GenAI- GeeksForGeeks
